26 JUN 1968

MEMORANDUM FOR: Director of Medical Services

SUBJECT : PATB Testing

1. Reference is made to the series of discussions and meetings concerning the new system of PATB testing of applicants. It is my decision that field testing [redacted]

[redacted] Part II of the test will be administered at Headquarters when applicants are invited to Headquarters for further testing requirements. The Headquarters testing battery will consist of the [redacted]

Test it is requested that the Assessment and Evaluation Staff arrange to provide substitute test questions replacing those current questions involving the names and positions of Congressional, Executive Department officers and public figures.

2. The decision to divide the test into two parts is based principally on the fact that this will now be known as a CIA test by various officers of [redacted] university faculty and administrative officers and student applicants and the Part II section, because of its subject matter, should be administered under controlled conditions at Headquarters. A previous survey of the users in the Agency of these test results indicated the splitting of the test into two parts to be given on different occasions would not adversely affect the recruitment effort.

3. The giving of Part II of the test at Headquarters during the applicant invitee visit will add approximately four hours to the testing schedule and accordingly some adjustments must be made in the scheduling system. Dr [redacted] will make necessary arrangements for this testing and in coordination with the Office of Personnel and Office of Security the schedule should be appropriately adjusted.

SIGNED R. L. Bannerman

R. L. Bannerman
Deputy Director
for Support
